

SCAFWEST
SAFE RELIABLE SCAFFOLDING SOLUTIONS

Australia's Defence Industry Access Partner of Choice

OUR DEFENCE JOURNEY – OVER 15 YEARS TRUSTED SUPPORT:

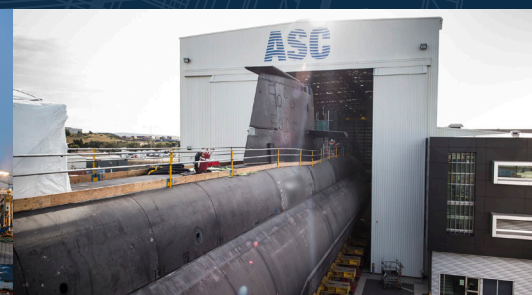

ScafWest has proudly partnered with Defence primes and contractors for more than 25 years, delivering safe, reliable, and innovative access solutions for some of Australia's most complex and sensitive projects in the naval shipbuilding and sustainment space. Our experience spans the sustainment of Collins Class Submarine, US & UK Nuclear Submarines, ANZAC classes, construction of offshore patrol vessels and more. Our point of difference lies in our reliability and consistency to deliver on promise, on budget and on time.

 **Watch ASC Pty Ltd share their experience partnering with ScafWest.**

WHY ACCESS MATTERS – THE HIDDEN ENABLER:

In the Defence environment, access solutions may appear secondary to the complexity of naval shipbuilding, sustainment, or infrastructure upgrades. With so many moving parts - specialist trades, tight schedules, budget constraints and security protocols - it's easy to view access as an insignificant piece of the puzzle, yet it is critical to successful delivery.

Poor access providers can derail critical milestones which mean delays for all other trades, creating cascading impacts on schedule, cost, and operational readiness. Conversely, the right provider delivers innovation, operational efficiency and industry-leading safety, positioning access as a key enabler of certainty in project delivery. ScafWest has been doing this for over 25 years.

THE SCAFWEST ADVANTAGE:

ScafWest understands the importance of access and has been refining our delivery while working with – and bringing value to – Defence primes for more than 25 years. Our continued success in the sector can be attributed to our ongoing growth and sustainment in our capability & capacity along with our agile and flexible approach to delivery.

4-Hour Response:

In the Defence sector, time is mission critical. Every hour of delay can impact operational readiness, maintenance schedules, and critical milestones. With a commitment to response times of 4 hours or less for contract clients, you can be sure your project stays on track.

Long-Standing Track Record:

ScafWest's reputation in Defence is built on consistent performance across complex, high-security projects for more than a decade and a half. Our long-standing relationships with Defence primes and contractors demonstrate trust, reliability, and capability at scale.

Defence Industry Security Program:

ScafWest has a commitment to security in all we do with experience navigating rigorous employee screening processes required for secure sites. This gives clients peace of mind ensuring sensitive information is protected and not put at risk.

Zero LTI on Defence Projects:

We started our Defence journey 15 years ago and have been LTI-free on Defence related projects from the outset, giving clients the confidence in our ability to deliver to the highest safety standards.

Scalable Defence Ready Workforce:

We maintain a substantial pool of skilled, experienced, defence ready workers through periods of both high demand and reduced activity.

Commonwealth and ISO Standards:

All ScafWest systems are ISO certified and have exceeded expectations of strict Commonwealth scrutiny and audits for many years.

Pricing and Budget Management:

We work within rigorous financial governance frameworks, ensuring cost control, accountability, and reporting that meet Defence audit standards.

Innovation and Continual Improvement:

Innovation sits at the core of ScafWest's approach, delivering continual improvement in safety, efficiency, cost management, and confidence in project delivery for our clients.

Access may be a small line item, but it underpins the success of every major Defence project. Choosing a trusted partner like ScafWest means choosing certainty, safety, and seamless delivery.

KEY PARTNERS AND PROJECTS INCLUDE:

We partner with major defence contractors in Henderson, Kwinana, Garden Island, Exmouth and Cairns
