

SCAFWEST
SAFE RELIABLE SCAFFOLDING SOLUTIONS

WA's Most Reliable Rope Access Provider

WHO WE ARE

ScafWest is Western Australia's most reliable access specialist, delivering end-to-end rope access services across mining and resources, defence and marine, industrial, infrastructure, and construction sectors. Our business model has been shaped since 1992 and is founded on earning and maintaining lasting partnerships based on trust, safety, quality, innovation, and exemplary performance. Our mantra is to always deliver safely on promise, on time, and on budget.

WHY ROPE ACCESS — A COMPLEMENTARY SOLUTION

Rope access is at its best when it works alongside scaffolding, not in place of it. ScafWest integrates IRATA-qualified rope access technicians into shutdown and maintenance planning with the goal of providing clients the most efficient, safe, and cost-effective solution. Not just to gain access, but to complete the work scope efficiently and minimise disruption, downtime, and cost.

With long-standing ISO-certified systems and an exemplary safety record, our IRATA-qualified rope access technicians have integrated seamlessly into our business model. Clients experience the same reliability, management expertise, and customised solutions they expect from ScafWest's scaffolding operations backed by 30+ years of project management discipline and safety systems.

THE SCAFWEST ADVANTAGE:

ScafWest's mission is to be WA's most reliable access partner. We are trusted by clients for our ability to deliver on our promise consistently, in all environments, no matter how challenging.

Outstanding Safety Record

Built on disciplined systems, experienced supervision, and a culture that puts safety first across every project environment.

Scalable Shutdown-Ready Workforce

Substantial pool of skilled, experienced workers and S26 supervisors. Large work crews mobilised to site in short timeframes.

4-Hour Response 24/7

Skilled workers and equipment mobilised within 4 hours. ScafWest is the fastest to attend breakdown situations across WA.

Innovation & Continual Improvement

In-house design and engineering capabilities drive continual improvement in safety, efficiency, cost management, and project delivery.

ScafWest's proven performance has seen us deliver safe, reliable rope access scopes, providing skilled trade crews, suitable equipment, and project planning support. Our partnerships with key clients demonstrate trust, reliability, and capability at scale.

CORE ROPE ACCESS CAPABILITIES:

Inspection & NDT

Rigging & Installations

Corrosion Control & Industrial Coatings

Mechanical Services / Shutdown Maintenance

Confined Space Management & Rescue

Alternative Access & Containment Solutions

“ ScafWest delivered skilled, professional rope access services for complex cladding works. The team integrated seamlessly into site operations. Strong leadership, technical expertise, and a proactive safety-focused approach enabled efficient delivery and successful completion of a complex scope. ”

Daniel Hirsch, Construction Manager
